

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-23. (canceled)

Claim 24. (currently amended) A server apparatus connected with a transmitting facsimile apparatus and with a receiving facsimile apparatus via the Internet, the server apparatus comprising:

a memory configured to store reception capabilities regarding a type of facsimile data that the receiving facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data; and

a controller configured to receive the facsimile data from the transmitting facsimile apparatus, to transform the received facsimile data into a type of facsimile data that the receiving facsimile apparatus can receive, based on the reception capabilities stored in the memory, and to transmit the transformed facsimile data to the receiving facsimile apparatus.

Claim 25. (currently amended) The server apparatus according to claim 24, wherein a the reception capability regarding a type of facsimile data is a type of file data that the receiving facsimile apparatus can receive.

Claim 26. (currently amended) The server apparatus according to claim 25, wherein a the type of file data is at least one of MH, MR, MMR and JPEG.

Claim 27. (canceled)

P18051.A16

Claim 28. (currently amended) ~~The Internet facsimile apparatus according to claim 27, wherein the controller~~ A server apparatus connected with a facsimile via the Internet, the server apparatus comprising:

a memory configured to store reception capabilities regarding a type of facsimile data that the facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data; and

a controller configured to receive an e-mail from the facsimile apparatus, determines to determine whether or not the an e-mail address included in the received e-mail is the a predetermined address, the e-mail with the predetermined address indicating the reception capabilities of the facsimile apparatus to be stored in the memory, the controller being further configured to store the capabilities of the facsimile apparatus in the memory, and in response to a determination that the e-mail address is the predetermined address, stores the capabilities of the facsimile apparatus in the memory.

Claim 29. (canceled)

Claim 30. (currently amended) A communication terminal capability exchanging method comprising:

storing reception capabilities regarding a type of facsimile data that a receiving facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data;

receiving the facsimile data from a transmitting facsimile apparatus;

transforming the received facsimile data into a type of facsimile data that a receiving facsimile apparatus can receive, based in the stored capabilities; and

P18051.A16

transmitting the transformed facsimile data to the receiving facsimile apparatus.

Claim 31. (currently amended) ~~The server apparatus according to claim 27,~~
~~wherein~~ A server apparatus connected with a facsimile via the Internet, the server
apparatus comprising:

a memory configured to store reception capabilities regarding a type of facsimile
data that the facsimile apparatus can receive, the reception capabilities being distinct
from the facsimile data; and

a controller configured to receive, from the facsimile apparatus, an e-mail with a
predetermined address, the e-mail indicating that the e-mail contains data regarding the
capabilities of the facsimile apparatus to be stored in the memory of the server
apparatus, the controller being further configured to store the capabilities of the
facsimile apparatus in the memory.

Claim 32. (currently amended) ~~The Internet facsimile apparatus according to~~
~~claim 29, wherein~~ An Internet facsimile apparatus connected with a server apparatus
via the Internet, the Internet facsimile apparatus comprising:

a communicator configured to communicate with a server apparatus via the
Internet; and

a controller configured to transmit, to the server by e-mail, reception capabilities
regarding a type of facsimile data that the Internet facsimile apparatus can receive, the
transmitted e-mail having a predetermined address, the e-mail with the predetermined
address indicating that the e-mail contains data regarding the capabilities of the Internet
facsimile apparatus to be stored in the server apparatus.

P18051.A16

Claim 33. (new) The server apparatus according to claim 24, wherein the transmitting facsimile apparatus and the receiving facsimile apparatus comprise Internet facsimile apparatuses.

Claim 34. (new) The server apparatus according to claim 24, wherein the controller transmits the transformed facsimile data to the receiving facsimile apparatus via the Internet.
